

Hi, I am James Dawson. **Senior Frontend Engineer** building beautiful experiences and crafting wonderful UIs for modern web products. Primarily in the Web3.

Senior Frontend Engineer Livepeer

2025–Present

Leading senior frontend and design engineering work across full product features, combining strong UX thinking with analytics, experimentation, SEO, and real-time video engineering to ship polished user-facing experiences.

Lead Frontend / Designer Gitcoin x Buildbox

2022–2025

Led the frontend, design, UX, and performance of a greenfield Web3 hackathon platform, owning the product experience end to end while managing a small team and representing the company across the Web3 space.

Freelance Frontend Developer Self-Employed

2020–2022

Built and designed NFT and Web3 products for multiple clients, focusing on frontend development, smart contract integrations, and fast-moving MVPs built from 0 to 1.

Senior Frontend Engineer PhotoShelter

2019–2020

Worked on a digital asset management platform for major organisations, helping maintain and modernise Angular applications while delivering new features with designers and stakeholders.

Frontend Engineer Financial Cloud

2017–2019

Started professional frontend engineering here, building and maintaining Angular applications and company websites while taking on both development and design responsibilities.
